

WHAT'S THE MATTER?

#2: WE ARE LEARNING TO DESCRIBE THE CHANGES OF MATTER AND THE WATER CYCLE

When a solid is heated it melts and becomes a liquid.
When a liquid is heated it evaporates and becomes a Gas.
When a gas cools it condenses and becomes a liquid.

Check out [this website](#) to help you to complete the Google Draw

Describe what happens at each stage of the water cycle

I created this myself on my ipad at home
