

# Maths

## **To get to the next level I need to:**

1. Practice **BEDMAS** more daily and work out some problems.
2. Finding multiple ways to solve a problem.
3. Understanding the problem and how to solve it.

## **I can help myself by:**

1. In my spare time, go on Math-whizz more often than usual.
2. Listening to the teacher as much as I can, to get information about what I'm learning.
3. Practicing my times table more and more.
